Okoume, a wood species native to Central and West Coastal Africa, is ideal for Marine Grade Plywood veneers. It glues and nails well and looks great with a varnish or covered in fiberglass. Its heartwood coloring ranges from salmon pink to light pinkish brown with a good natural luster, and it has a pleasing, Mahogany-like straight to interlocked grain.

Appearance & Grain
Heartwood ranges from a pale pink to light brown. Color darkens with age. Narrow heartwood is grayish white, not clearly demarcated from heartwood.
